PROFILE SUMMARY

Highly motivated and detail-oriented frontend web developer with expertise in building responsive and scalable web applications using React, NextJS, and other technologies.

I excel in optimizing user engagement and streamlining processes, delivering impactful results in fast-paced environments.

TECHNICAL SKILLS

- Frontend: React JS (16+), NextJS (12+), HTML, CSS, Javascript / Typescript
- Backend: Sails JS, Express
- Databases: Postgre SQL
- Problem-solving
- Critical thinking
- Detail-oriented

SOFT SKILLS

- Collaborative team player with strong self-motivation.
- Adaptable and flexible with changing priorities and technologies.
- Innovative problem-solver with a passion for latest trends.
- Excellent communicator with cross-functional team experience.
- Strong time management and organization skills.
- Proven leadership and mentoring experience.

WORK EXPERIENCE

Student Cornr, Nigeria

2023- PRESENT

Web Developer

- Improved user engagement: Designed interactive v1 landing page with waitlist, collecting user data via Firebase.
- Streamlined content management: Developed enhanced blog platform for creating, editing, and managing posts and comments.
- Boosted brand visibility: Implemented structured domains and SEO optimization for increased web product visibility.
- Enhanced product engagement: Designed v2 landing page with cleaner UI, interactive animations, and effective feature showcase.

Lynccup Services Limited, UK

DEC 2024

Front End Web Developer

- Increased brand visibility by building the company's landing page, connecting the domain, and setting up SEO for better search ranking.
- Developed a system facilitating event ticket transactions and social interactions.
- Enhanced transaction security and efficiency by integrating Stripe.

Palace Life Academy, Nigeria

MARCH 2024 -

DECEMBER 2024

Web Developer

- Built a comprehensive school management portal for streamlined administration, academics, and payments.
- Improved teacher workflows by automating attendance tracking, report generation, and lesson note uploads.
- Optimized academic management with features for assigning teachers, setting deadlines, and managing timetables.
- Enabled parents to view student performance, generate reports, receive reminders, and make payments online.
- Provided students with access to academic reports and an interactive CBT system with instant result updates.

CERTIFICATIONS

- Web Development Bootcamp, Udemy.
 - CSS Foundations, Frontend Masters.
 - Responsive Design, Scrimba.
 - Getting Started with Javascript, Frontend Masters.
-

ACCOMPLISHMENTS

- Participated in the Solana Global Hackathon, 2024, where I connected a frontend application to a web3 backend and was awarded a grant, which enabled me to further develop my skills in Web3 development.
- Taught Frontend Web Development in a Bootcamp organized by Google Developer Student Group, Lagos State University
- Actively participated in two frontend design challenges on X (aka Twitter)

PERSONAL PROJECTS

- Volunteered at a health care oriented startup as a Frontend Web Developer intern, where I contributed to the development of a web application for healthcare professionals.
 - Solana Blockchain Project:
 - Connected a React application to a smart contract on the Solana blockchain, demonstrating proficiency in Web3 development and blockchain interactions
 - ICP Blockchain URL Shortener:
 - Designed and developed a URL shortener on the ICP (Internet Computer Protocol) blockchain, utilizing Motoko (ICP's native language) for the backend and React for the frontend. This project showcases expertise in building scalable and secure Web3 applications.
-
